GRID LOCK

Gotham City is in trouble and Batman and Robin are called to the rescue. But this time Batman's partner has a new look!

The first grid shows a picture with its pieces mixed up. To complete the picture, find box 1A in the first grid and copy it exactly into the second grid's box 1A. Then copy 1B into 1B, and so on. When you've copied all of the boxes, you'll see Robin's new crest.

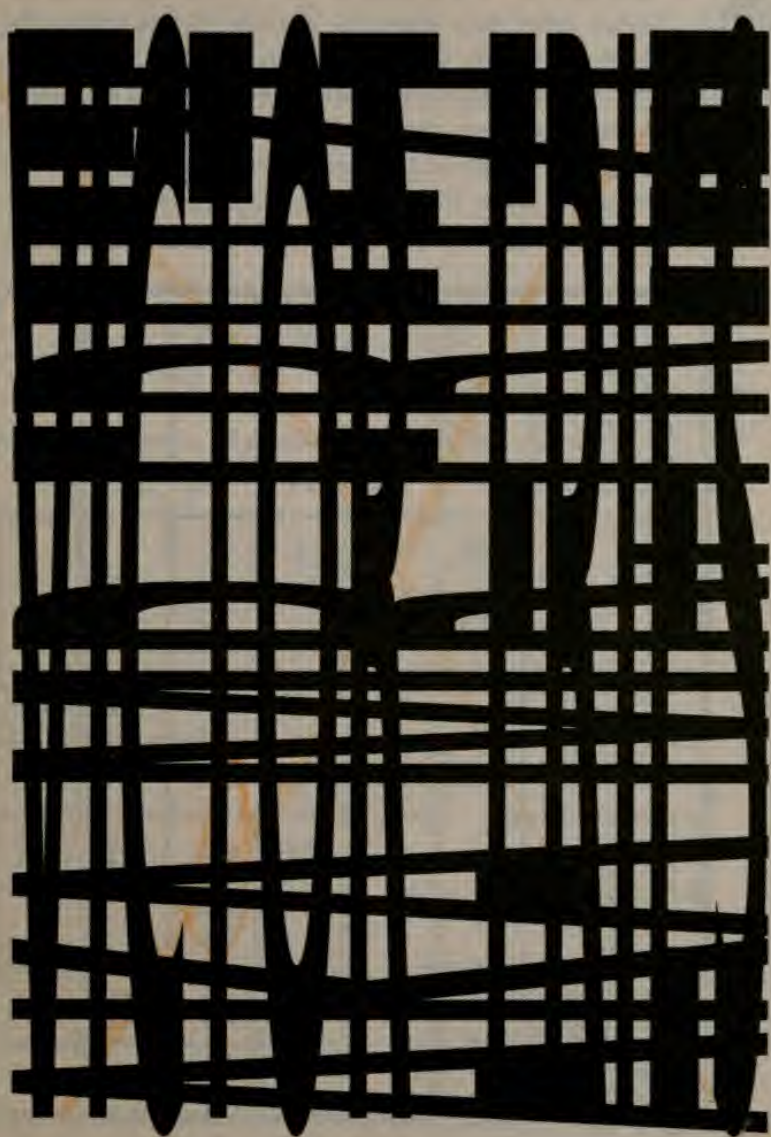

RADAR RACE

With Batman behind the wheel of the Batmobile and Robin riding his Redbird motorcycle, the crime fighting team cruises through Gotham in hot pursuit of one of the city's most dangerous villains. Suddenly, they spot him on their radar detectors headed for the Gotham Museum. To find out who this villain is, check the Bat-tracking device at the right.

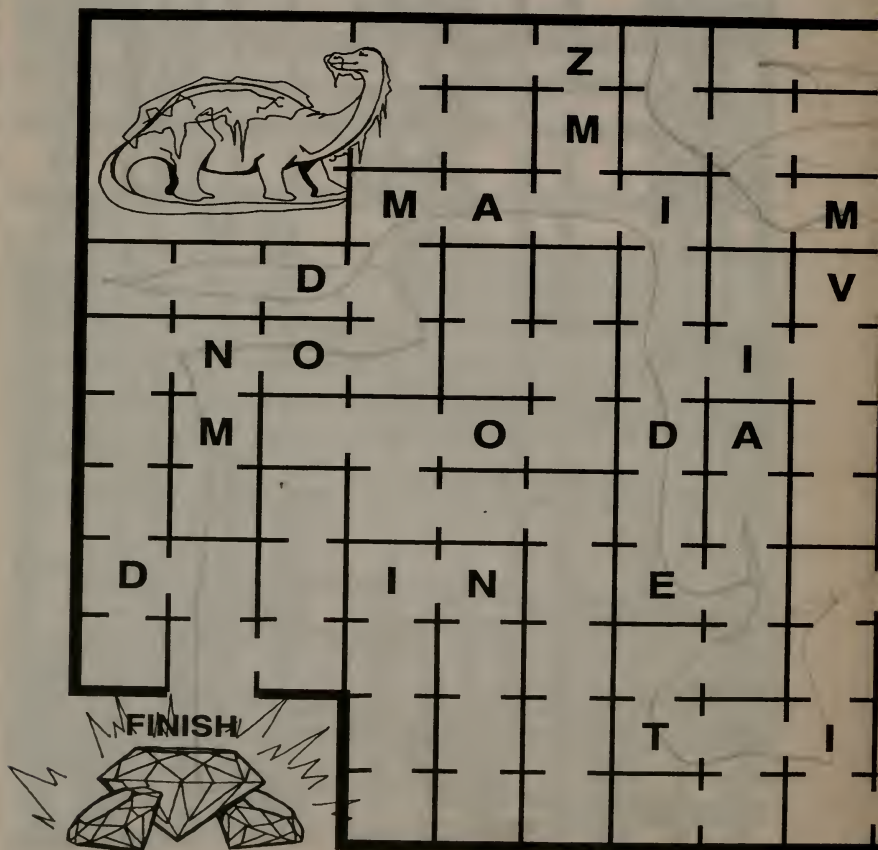

To decipher the message, hold the page at a very low angle, with your nose at the bottom. Read the message, then turn the book sideways and read the rest the same way.

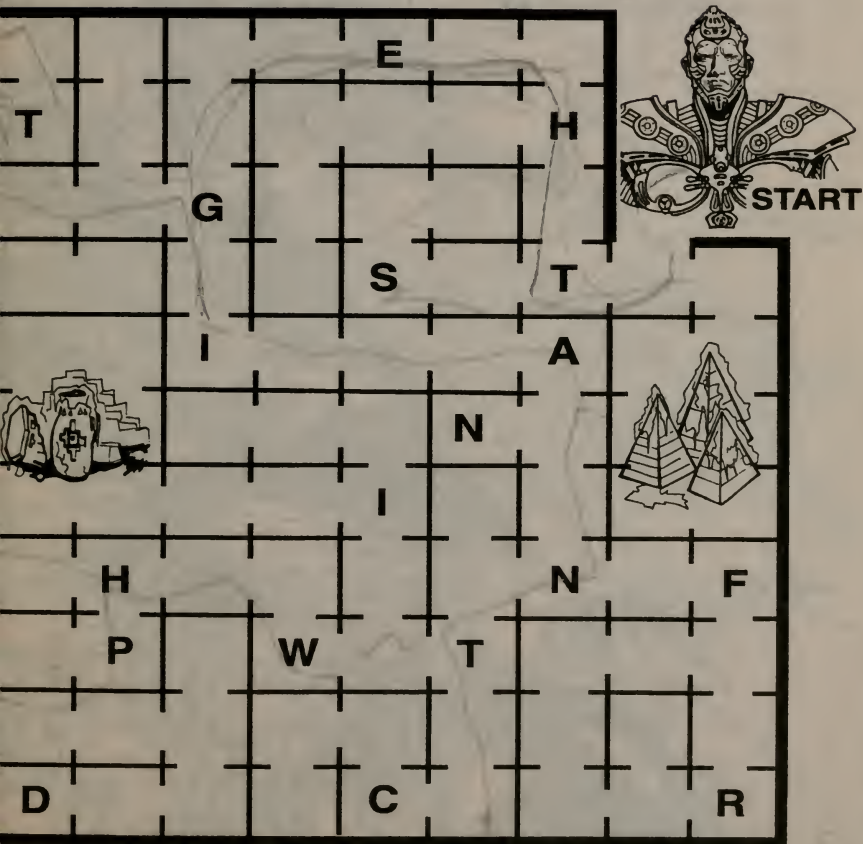

MAZE MAYHEM

Mr. Freeze and his sidekick, Frosty, break into the Gotham Museum, freezing everything in their way. Mr. Freeze is looking for something—something he needs to fuel his massive icing power. Follow them through the maze, picking up letters as you go and writing them in the spaces provided. Only the letters along the correct path through the maze will spell out what they are looking for.

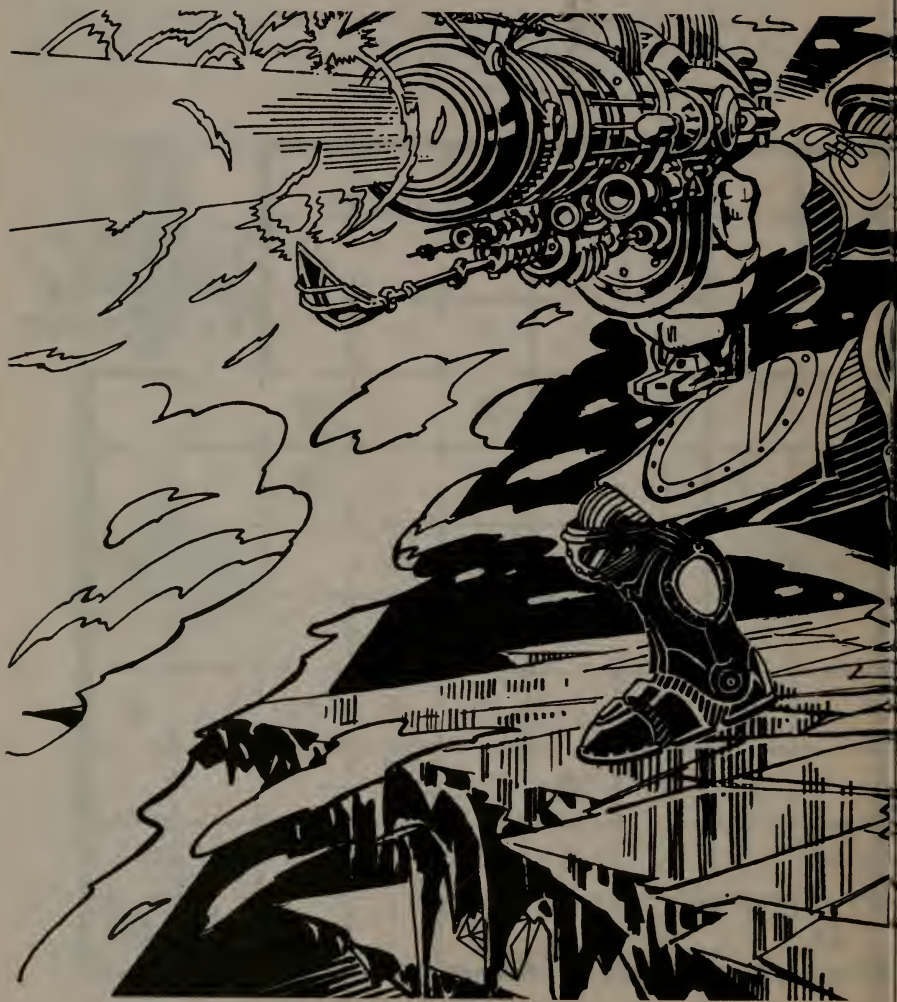

Answer:

ON ICE

Before Freeze can escape the museum with the diamond, Batman and Robin crash through the museum's skylight and surprise Freeze and his Icemen.

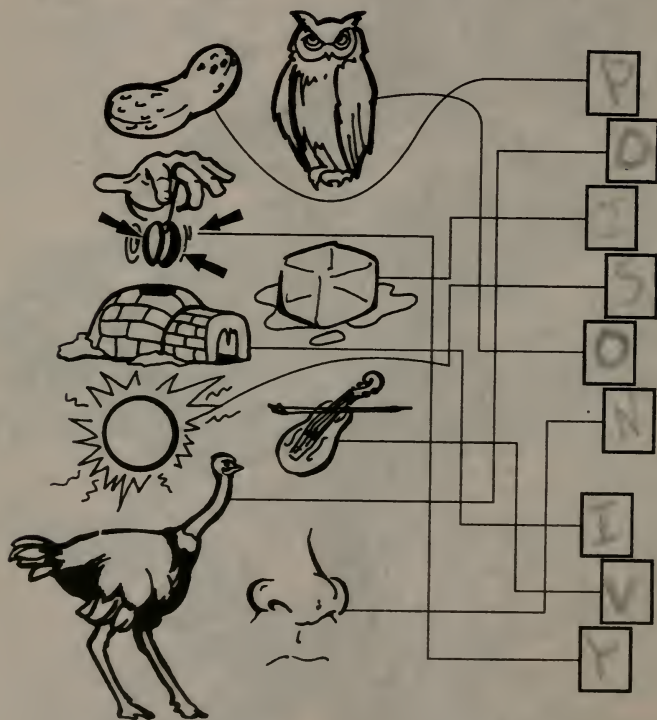

In the battle scene below, Batman and Robin are trying to recapture the Giant White Diamond. Can you spot the diamond hidden in the picture?

ROOT OF ALL EVIL

Freeze isn't the only criminal in Gotham that Batman and Robin have to contend with. After a horrible laboratory accident, Dr. Pamela Isley became a dangerous villain. To learn the name of her evil alter-ego, follow the path from each picture on the left to its attached box on the right. Then write the first letter of each picture in the box it's connected to. Those letters, reading from top to bottom, will spell out the answer.

CHILL IN THE AIR

Batman, Robin, and Batgirl manage to fight off Freeze's icemen—but they arrive at the Gotham Observatory too late to stop Freeze from carrying out his evil plan. He's already frozen half of Gotham! Then Batman gets an idea: By turning the telescope from an icing gun into a thawing gun, he can reflect the sunlight from across the world to Gotham and melt the frozen city.

Unfortunately, Freeze has one last dirty trick up his icy sleeve. Color in all the lower-case letters in the igloo below. When you're done, the leftover letters, in order, will spell out Freeze's last evil deed.
